Juni 2019

EIN SERVICE IHRES ENTERPRISE EUROPE NETWORK BREMEN

Der Newsletter „NewTec“ informiert Sie jeden Monat über ausgewählte Kooperationsangebote und -gesuche ausländischer Unternehmen aus mehr als 60 Ländern weltweit, die Geschäftspartner in Deutschland suchen. Des Weiteren bietet Ihnen der NewTec Europe Newsletter eine Übersicht über aktuelle Partnergesuche für EU-Forschungsprojekte.

Anfragen senden Sie uns bitte mit Hinweis auf die Angebotsnummer (z.B. K5) und die NewTec-Ausgabe.

BIOTECHNOLOGIE & MEDIZINTECHNIK

TECHNOLOGY OFFERS

K1 Targeting unfolding protein response to prevent neurodevelopmental disorders (ref. TOBE20190508001)

Neurodevelopmental disorders may impair motricity, behavior, language or cognitive capacity. A Belgian university research group develop models of cerebral cortex development. The group used this comprehensive set of models to demonstrate that inhibitors of unfolded protein response activation pathway stand as potential therapeutics to treat or prevent neurodevelopmental disorders, and is seeking for research collaboration with companies in the field.

TECHNOLOGY REQUESTS

K2 A Belgian company specialised in medical devices looks for partner to develop a personal defibrillator (ref. TRBE20190114001)

The Belgian SME is active since 20 years in the field of equipment for security at work and medical devices distribution, in particular by distributing automated external defibrillators (AED) for years. In association with an experimented anesthesiologist-emergency physician, the company has developed a concept of personal portable device. It is now looking for partner under research cooperation agreement, to develop the prototype and potentially get the product ready for commercialization.

[Mehr Infos](#)

Bulgarian research team is working in the field of automation of complex micro/nano manipulation processes. The new offered product presents a robotic system for in-vitro fertilization. The innovative aspect is that the procedures as cell injection and sperm tracking and holding could be realized automatically. The research organization is looking for commercial agreement with technical assistance with companies working in the field of medicine, in-vitro fertilization, cell manipulation.

CHEMIE, KOSMETIK & MATERIALTECHNIK

TECHNOLOGY OFFERS

K5 An innovative thermo-liquid insulating material (ref.TOMK20190515001)

A Macedonian producer of building materials is offering an innovative insulating material with enhanced properties. The material is a water-based liquid composition characterised by low thermal conductivity and specific weight, usable in temperature ranges from -60 to +170 degrees Celsius and possessing improved water- and soundproof properties. The company is looking for manufacturers of building materials interested in commercial agreement with technical assistance.

[Mehr Infos](#)

K7 Ultra high-performance adhesion / nanocoating technology for licensing (ref. TODK20190513001)

A Danish company has developed a breakthrough nanometer-thin adhesion technology enabling easy bonding of metal, glass and other materials to plastics. The nanocoating is invisible, extremely strong and can endure harsh conditions, while chemically safe, environmentally friendly and designed for easy disassembly of components. They are looking to license the technology to production companies in various industries which are developing new products, launching new business strategies etc.

ENERGIE & UMWELT

TECHNOLOGY OFFERS

K11 Air curtain device for museum applications. (ref. TOIT20190419001)

An Italian research team is developing an air curtain device for museum application. The device is able to preserve museums artefacts from microclimatic conditions and atmospheric pollutants by means of a mobile air curtain technique. The curtain will behave as a virtual barrier capable of preserving the object from the environmental pollution, allowing at the same time its fruition by the public. Partnerships sought are technical cooperation agreements.

[Mehr Infos](#)

K13 Radon detector device for real time monitoring (ref. TOIT20190520001)

An Italian company manufacturing measurement devices for scientific labs has developed a cheap, highly sensitive and real time radon detector for different applications like indoor and underground ambients, automatic ventilation systems and radon suppressed systems. Radon is cancer-causing radioactive gas, a hot topic in USA and EU. Companies in the gas detectors market interested to adopt and commercialise the radon detector device are sought for commercial agreement with technical assistance.
