

INTERNATIONALE KOOPERATIONSANGEBOTE Februar 2021

EIN SERVICE IHRES ENTERPRISE EUROPE NETWORK BREMEN

Das Enterprise Europe Network bietet Unterstützung und Beratung für Unternehmen in ganz Europa und hilft Ihnen, Ihre Chancen auf dem europäischen Markt optimal zu nutzen. Mit fast 600 Partnerorganisationen, deckt das Netzwerk mehr als 60 Länder in ganz Europa und darüber hinaus ab.

Der Newsletter „NewTec“ informiert Sie jeden Monat über ausgewählte Kooperationsangebote und -gesuche ausländischer Unternehmen, die Geschäftspartner in Deutschland suchen. Des Weiteren bietet Ihnen dieser Newsletter eine Übersicht über aktuelle Partnergesuche für EU-Forschungsprojekte und Matchmaking Veranstaltungen.

Um weitere Informationen zu einem Profil oder dem EEN zu erhalten, kontaktieren Sie uns bitte unter Angabe der Referenznummer (z.B. TOUK20200616001).
Wir freuen uns auf Ihre Anfragen!

Ihr Team vom Enterprise Europe Network Bremen

AERONAUTICS, SPACE & DEFENCE

TECHNOLOGY OFFERS

A Dutch SME offers its extensive expertise in the field of radiation shielding and is specialized in casting and machining of precision components made of lead and lead alloys

TONL20201211001

A Dutch SME is specialized in lead casting and lead machining. Lead is frequently used as a material in machines where X-rays, electron radiation and nuclear radiation must be shielded, such as medical devices and analytical equipment. The combination of radiation expertise, casting and precision machining of lead makes the SME special. The SME is interested in a manufacturing agreement to manufacturers and system integrators that need precision parts of lead and related radiation expertise.

AGROFOOD

TECHNOLOGY OFFERS

Cost-effective treatment of tap water for land-based aquaculture

TOSG20201222001

Optimum water quality is vital for fish health and aquaculture systems. A Singapore startup is offering an aquaculture system that can control the salinity and alkalinity of sea and fresh water to achieve optimal water conditions for different stages of fish growth.

It seeks to partner SMEs or MNEs via licensing to commercialise the technology for fish farming or commercial agreements with technical assistance.

Moldovan inventor is looking for manufacturing of reinforced wooden (oak) barrels with patented stainless steel equipment

TOMD20201230001

The inventor from Moldova proposes an innovative, fully controlled and accelerated technique for making and aging wine, beer, cider and aging spirits. The Patented Equipment with reinforced wooden barrels will help winemakers and WINE Industry globally to make wine without Additive and/or No added Preservative. It also gives control over oxidation, evaporation during beverage making and aging as well as during laboratory and tasting sampling.

TECHNOLOGY OFFERS

An Italian company has developed a specific hybrid technology, applicable in both series and parallel configuration, oriented to diesel-electric hybrid propulsion systems for off-road applications is looking for technical and research cooperation agreements

TOIT20210113001

An Italian SME has developed state-of-the-art engineering competence in the field of diesel/electric hybrid powertrain applied on equipment traditionally powered by diesel engines. This SME offers its competence to European manufacturers of components like electric motors and control units and is looking for technical and research cooperation agreements. Other partners involved are manufacturers of machinery interested in converting their diesel-powered equipment into hybrid/electric.

TECHNOLOGY OFFERS

UK based SME offers their capability for manufacturing SARS-CoV-2 spike protein to diagnostics developers and manufacturers

TOUK20210120001

The current global coronavirus pandemic makes the development of better, more rapid diagnostics tests a priority. Such tests require high quality SARS-Cov-2 spike protein and the ability to take account of arising mutations. A UK-based SME has the capability to make such protein and is looking to partner with companies developing or manufacturing such tests. It is envisaged that the partnership would take the form of a manufacturing agreement, a technical cooperation or a research cooperation.

TOAT20210111001

A consortium of Austrian research institutions with extensive knowledge in the development of textile sensors, the research of stroke medicine and close connections to clinics is looking for partners to collaborate under a technical agreement.

With this know-how, the consortium is developing a wearable device as a medical device ("sensor shirt"). This item will have the ability to monitor a variety of indicators for key bodily functions for the care of aged individuals and medical patients

RESEARCH & DEVELOPMENT

The consortium of a Turkish company and a German institute that offers 3D-printed patient specific implant production is looking for a German SME partner regarding biocompatibility and in-vivo animal testing in Eurostars project.

RDTR20201226001

An innovative Turkish company specialized in additive manufacturing and medical 3D printing focuses on custom made implant production for craniomaxillofacial patients. Having several properties such as biodegradability, drug release mechanism etc. provides the advantages of a controlled mechanism for the custom made implants on the defect region. The company and its German institute partner are looking for a German SME partner experienced in biocompatibility tests and in vivo studies.

MOBILITY, TRAFFIC & LOGISTICS

TECHNOLOGY OFFERS

Spanish producer of new foldable 20 feet dry container for transport, capable of packing 5 empty containers in the space of a standard container, looks for a commercial agreement with technical assistance.

TOES20210120002

A Spanish company, born to bring innovation to the transport and logistics sector, has developed a new generation of foldable container to make transport more sustainable. They are searching for companies that normally use containers for transport, and who have unbalanced routes with need of empty containers' repositioning. The value proposition is to rent them one or more groups of foldable containers for their use, under a commercial agreement that will include its technical assistance.

Modular battery pack for sustainable mobility

TOES20201218001

A Spanish company specialized in modular design of battery packs and powertrain for electric vehicles is looking for potential partners in order to apply for European projects focused on electric mobility and sustainable technologies applied to vehicles. They offer themselves as partners or subcontractors in related project proposals under a research cooperation agreement. The company is also interested in a technical cooperation for further development of products/technologies.

NEW MATERIALS & NANOTECH

TECHNOLOGY REQUESTS

Permanent anti-fog and anti-mist treatment sought for transparent facemasks

TRUK20210127001

UK company manufacturing transparent face masks is looking for a permanent hydrophilic treatment for thermoplastic elastomer transparent material. They require a function (ideally via additive, functionalisation or coating) so the material remains anti fog after exhaling on it or during temperature changes. Potential collaborations are sought under commercial agreement with technical assistance, licencing or manufacturing agreement.

A French company is looking for expertise in Physical Vapor Deposition (PVD) to manufacture a thin nanolayer containing different chemical compound via a manufacturing agreement.

TRFR20201207001

The French company develops selective nano gas sensor with components on Metal Oxide Semiconductor (MOX) technology.

The company is looking for a partner that can deposit a thin nanolayer containing different chemical compounds by Physical Vapor Deposition (PVD) under a manufacturing agreement.

TECHNOLOGY OFFERS

Nanoceramic coating for light alloys, superior to anodising and plasma electrolytic oxidation (PEO)

TOUK20210114001

A UK company has introduced novel coating for high hardness and low friction, superior to anodising or plasma electrolytic oxidation (PEO). Fast moving parts in various machinery and engines have a longer life, whilst being easier to produce. Manufacturers of machinery in various sectors such as textiles, packaging, aerospace, food, motor sport, luxury goods, are sought for manufacturing and commercial agreements with technical assistance, and licensing.

Singapore institute seeks partners to license and commercialise a steel plate laser blasting device that is compact, cost-effective and environmentally friendly

TOSG20201221001

Traditional industrial cleaning methods are often tedious, time consuming and possibly dangerous. A Singapore academic and research institute has developed a laser cleaning technology that removes coating, rust and surface contamination, through an environmentally-friendly process that has low dust emission, low noise, and low waste volume.

It seeks to partner SMEs or MNEs via licensing or commercial agreements with technical assistance.

Smart inks based on a photoinduced thermoluminescent composition to prevent counterfeiting

TOES20210125001

A Spanish nanoscience and nanotechnology research centre has developed innovative photoinduced thermoluminescent inks to prevent counterfeiting in several industries. The inks are composed of metal nanoparticles, phase change materials (PCM) and fluorescent dyes which respond to near infrared radiation (NIR) producing a change in the optical properties (fluorescence) of the material. Companies cosmetics&pharma, packaging, banknotes... are sought for research collaborations or license agreements.

Electrode mass of zinc electrode for alkaline rechargeable batteries

TOBG20201221001

A Bulgarian research institute with more than 50 years of experience in electrochemistry and energy systems has developed an innovative electrode mass of zinc electrode applicable for alkaline rechargeable batteries. The institute is looking for commercial agreements with technical assistance with interested companies for the implementation of the innovation.

High efficiency rust converter

TOBG20201217001

Bulgarian research team has developed a multi-component rust converter with active components. The product converts the rust in high valence oxides and phosphates of iron covering the surface with protective film. The latter performs two functions - barrier-shielding and as a primer for sequential deposition of paint coatings. The research team is looking for collaboration with manufacturing companies for commercialization of the product via a commercial agreement with technical assistance.

Stable aqueous dispersion of silver nanoparticles

TOBG20191211002

A Bulgarian research organization with R&D experience in the field of polymer chemistry and materials science has developed an innovative method for synthesis and preparation of highly concentrated dispersion of silver nano

particles with high antibacterial activity. The team is looking to reach commercial agreements with technical assistance with interested companies for the implementation of the technology, license or technical cooperation agreements.

TECHNOLOGY OFFERS

Corporate travel management and sales platform

TOES20201109001

A Spanish SME, active in the area of solutions for tourism, has developed a platform (web and app) for the management and sale of travel reservations for companies, previously filtered by the internal policies of each company. The travelers will be able to book any type of lodging or transport following and fulfilling the internal policies of the company. They seek partnering with companies that manage their own corporate travels for testing or commercial agreements with technical assistance,
