EXPORT SUPPORT WORKSHOP ON MARITIME TRANSPORT SECTOR

Impact of the Economic Partnership Agreement between the European Union and Japan on the maritime transport sector.

On 3 November, the EU-Japan Centre with the support of Enterprise Europe Network partner organisations in the EU, members of the Sector Group Maritime Industries & Services, organised an online workshop dedicated to EU companies seeking to understand the various segments of the maritime transport industry in Japan, as well as the impact of the EU-Japan Economic Partnership Agreement in this sector.

The attendees, local companies mostly from Germany, France and Denmark, accompanied by Enterprise Europe Network, had the chance to learn more about the topic and to ask questions to the experts Mr Max Berre, Economist and Journalist with years of Japan-related experience and Ms Chieko Nakabayashi, Professor, Researcher and Consultant on Business Development, based in Brussels and Tokyo.

The EU and Japan's Economic Partnership Agreement (EPA) entered into force on 1 February 2019 offering European companies to benefit from removed tariffs and simplified customs procedures.

It positively affected trade flows on the Asia-Europe route.

In Japan, Top 3 Maritime Ports in trade volumes are Nagoya, (11%) Tokyo (11%) and Yokohama (7.6%). Demand for direct routes from/to Europe reaches 38.8%. Japanese shipping companies operate mergers and acquisitions, separate operations from ownership to lighten assets, using Non-Vessel Operating Carrier and strengthen alliances to increase cost and geographical efficiency.

For more information on the topic, please go to the [EU-Japan Center's website](#) with available presentations delivered during the webinar.
